

BLACK ANGUS BULLS

In 1997 we added Black Angus cattle to our operation. We have slowly built a very select herd of well bred Angus females with a diverse genetic base. We strive to produce bulls that will meet the needs of many of our customers who use this breed in their crossbreeding programs. There's a mix of calving ease and high performance sire prospects that can be used for different applications whether it be to breed cows or heifers. Our Black Angus cow numbers continue to grow and we have more bulls for sale. Please note that the 205 day adjusted weights on the majority of the Black Angus bull calves are lower this year as this group of cattle were on poorer pasture that was hit hard by the drought conditions. Lots 83 and 84 had better pasture as their dams were in a different breeding group. Their weaning data (205 day weights) illustrates the same.
